

DTS-EZ MARK LASER

Laser Marking Machine-Type V

Data Technology Systems fiber laser marking adopts the world's most advanced technology, it is the third-generation laser marking system. It adopts fiber laser source to achieve marking function by ultra-high-speed scanning system. The fiber laser marking conversion is efficient, longer lifespan and energy-saving.

The machine is enclosed in a stylish metal cabinet, The new cover design allows easier operator access to the plate refill hopper, although still ensuring adequate safety from the laser source. This ruggedly built design will withstand the harshest of industrial environments.

Key Features:

- Marking Area: 70mm*70mm
- Produces 300 plates per hour
- JPT LP laser source 30W
- Original JCZ Control and EzCAD2 Software
- WISE SCAN galvo head
- With 110V /60HZ
- With Automatic feeding system - Adjustable input hopper
